Focus on Benign Thyroid Disease: From Thyroid Nodule to Hyperthyroidism and Immune Disease

Facilitators:
Murat Tuncel
Daniel Gröner
Lavinia Vija

Day 1		
	Session I	
09:30-10:00	Introduction of the Speaker and the Participants	10
10:00-10:20	Principles of physiopathology of thyroid function	20
10:20-10:40	Clincial presentation of benign thyroid disease (classifications, syntoms and biological exams)	20
10:40-11:00	Coffee Break	20
	Session II	
11:00-11:20	Principles of neck ultrasound of the neck and the thyroid	20
11:20-11:40	US classification of thyroid nodules and evaluation of diffuse thyroid disease	20
11:40-12:30	Interactive session (US images presentation)	50
12:30-13:30	Lunch Break	60
	Session III	
13:30-13:50	Fine needle aspiration (FNA) biopsy principles, washout techniques and cytology classification and molecular test	20
13:50-14:30	Case Reading session	40
14:30-14:50	The principle of iodine and MIBI thyroid scintigraphy for benign thyroid disease	20
14:50-15:40	There is a role for PET in thyroid nodules?	50
15:40-16:00	Coffee Break	20
	Session IV	
16:00-16:20	Managements of thyroid nodules (new guidelines)	20
16:20-17:20	Interactive session (clinical cases)	60
17:20-17:30	Wrap Up	10
17:30	End of Day 1	

Day 2		
	Session V	
09:00-09:20	Clinical management of hyperthyroidism	20
09:20-10:10	Radioactive iodine treatment of hyperthyroidism	30
10:10-10:20	Coffee Break	10
10:20-10:40	Radiofrequency ablation	30
10:40-11:20	Case Reading session	40
11:20-11:40	A specific focus on Graves disease and managment of ophtalmopathy	20
11:40-12:00	The case of iatrogenic thyroid disease with a specific focus on immunotherapy	20
12:00	End of Day 2
